

If your agency is has a specific set of complex data for analysis, we can provide an analytics platform to process your information. **TechSur Solutions delivers this service as a package that your agency can purchase today under an 8(a) STARS III direct award.** Using this BEST IN CLASS vehicle, your agency can award contracts of up to \$4.5 million on a non-competitive basis. This means a data analytics platform is within reach – this fiscal year, with end-of-year money, all while meeting small business contracting goals.

What Does an Analytics Platform Involve?

When analyzing large amounts of data for your agency, we take a holistic view of your information, focusing not just on the data points, but on the entire ecosystem of services and technologies. Our data experts can process large or small amounts of data, ranging from the simple to the complex, including data that shifts regularly.

TechSur Solutions works with your existing technologies and contractors to provide a platform that allows your team to retrieve, explore, connect, and visualize your data. Providing an analytics platform gives a unified solution to agency staff that meets enterprise needs and improves business operations in order to achieve the mission effectively. Our platform consumes data from any source, provides robust integration, and creates dynamic reports.

Platform Benefits

Replace Legacy Software, Tools, and Systems
