TECHSUR
PASSION MEETS TECHNOLOGY

DevSecOps REPLAY Platform

TechSur Solutions provides Federal agencies with a **DevSecOps repeatable, one-click platform** with the DevSecOps REPLAY Platform. This plug-and-play platform is a packaged collection of verifiable operations that produces secure code quickly, using an agency's existing technologies and staff.

Learn More

End-to-End Enterprise DevSecOps Platform Provisioned with Just One Click!

PRE-BUILT CATALOG OF SOLUTIONS

Built-In Support for AI/ML Deployments

Secure Cloud Computing Architecture

Data Ingestion Stacks (Kafka/Spark) with Automation

Integrated Machine Learning Operations (MLOps) Pipeline

ONE-CLICK PLATFORM BENEFITS

Simplifies installation/development config challenges. Single-click containerized platform for cloud-native solutions. Ability to monitor/manage upgrades & patches. Implements multiple automation tools to track processes. Treats Infrastructure as a Code.

Out-of-the-Box Security
- Pre-built templates eliminate Kubernetes deployment pain points (e.g., secrets creation, Helm configurations).
- Built-in GitOps & Secrets Management for enterprise-grade deployments.
- One click to plug in security during Continuous Integration & Continuous Delivery (CI/CD).
- Integrated automated testing highlights vulnerabilities real-time.

On-Premise & Multi-Cloud Support
- Support both on-premises & cloud deployments, including multi-cloud operations.
- Deploy anywhere from edge to: commercial clouds, government clouds, & even air-gapped environments.
- Deploy Big Bang stacks on AWS & Azure GovCloud.
- Pre-hardened containers shorten deployment time.
- Cloud-agnostic components.

Faster Deployment & Continuous Authorization to Operate (ATO)
- Deploy in minutes versus months.
- Faster path to ATO approval with accredited containers.
- Manages risk in networks through constant security control evaluation.
- Ensures each member of the workforce is accountable.
- Packaged deployment pre-configures DevSecOps pipeline tools, saving time & resources.

The DevSecOps REPLAY Platform is one element of TechSur's Total Engagement package, which automates the process of IT Modernization in a package. This integrated experience spans across all technologies with our Tech SURROUND, and maintains a focus on the total experience of end users with our User ENGAGE.

Total Engagement means a focus on the total experience of each user in your agency.
